

The printing industry will never be the same again. There is a change on the horizon, flying on the wings of innovation, coming to inject new life into UV Flexo ink technology. Toyo Ink Arets N.V. introduces Steraflex, an incredible product for UV Flexo printing. Extensive Japanese technology coupled with European expertise and production values is fundamental to the success of this outstanding product. Available in two variants, Steraflex and Steraflex FOOD, they are noted for their excellent flow characteristics, high intensity colours and unparalleled curing speeds.

Experience a new wave of innovation in the rapidly evolving world of UV Flexo printing with Steraflex. The colourful growth of UV Flexo ink in narrow web label applications and for wide web packaging has made this technology highly valued and widely sought-after by converters around the globe.

— Contemporary Products — Steraflex

Steraflex, the UV-curable Flexo ink series from Toyo Ink Arets, brings spectacular pace and value to your UV Flexo printing. Steraflex delivers an optimum blend of profound knowledge from Toyo Ink Group and extensive European experience. Thus, the results are vivid and sharp with excellent depth of quality. Such a unique combination of skills from the East and West makes Steraflex universally versatile.

Key features of Steraflex:

The comprehensive formulation of Steraflex not only reinforces the fundamentals of UV Flexo printing but also moves the Flexo revolution forward by promising:

- Productivity boost higher than ever
- Superb Ink transfers from high resolution aniloxes
- High-speed curing and a very stable ink flow
- Superb adhesion to a wide variety of substrates
- Bright, vibrant and close-to-reality images
- Formulation without ITX and Benzophenone
- Environment-friendly manufacturing process

Suitability of Steraflex:

Theoretically, any printing result is achievable with Steraflex. However, it is best suited for:

- High-speed latest generation UV Flexo presses
- Self-adhesive labels and tags
- Flexible packaging
- Carton and paper printing

Available colours:

- Process colours
- Opaque white
- Wide range of base colours for blending
